## **eBillingHub Market Momentum Continues To Gain Strength**

*Explosive Growth Highlights Strong Demand for Simplification of Legal Electronic Billing*

**PITTSBURGH, August 2, 2007** — eBillingHub®, the leader in simplifying law firm electronic billing, today announced record results for the first-half of 2007. Highlighted by a 100% increase in its customers, impressive customer wins in the AmLaw 200, new time and billing platform support, and widespread industry validation, eBillingHub has reached a new level of market awareness and success.

“Law firms are suffering financially from the ebilling complexity and volume and need a way to simplify the process. CFOs and Controllers realize that adding more billing staff is not the answer; they need tools to reduce the complexity of the process,” said Greg Coticchia, CEO of eBillingHub. “Since our founding in 2002, eBillingHub has consistently set industry standards for helping law firms realize the promise of electronic billing: faster collections with improved cash flow, all while maintaining administrative costs under control. The market is clearly recognizing the crucial business value that eBillingHub delivers. We will continue to work tirelessly in the months ahead to solidify our position as the industry leader in simplifying law firm electronic billing.”

eBillingHub’s recent milestones include:

- A rapidly expanding customer list and close interaction with existing customers. For example, AmLaw 200 customers such as Alston& Bird, McKenna Long, Choate, Hall & Stewart, Bracewell & Giuliani, Kutak Rock and others have chosen the eBillingHub.
- New functionality to give visibility to CFOs and others. The eBillingHub dashboard was released in Beta, providing real-time analysis of electronic billing activities across all the ebilling vendors and clients from a single web screen.
- Additional time and billing platform support, with the addition of ADERANT CMS, adding to its existing support for Thomson Elite and ProLaw.
- Invitation to present to the Nashville Area Meeting of ILTA, where Daniel Garcia, founder and CTO, discussed “Thinking Strategically About eBilling” which was also published as an article by ILTA.
- Presence of eBillingHub customer beyond the U.S. and internationally, including Bermuda and Canada, showing evidence of the widespread need for simplification.

- New website launched providing more information about the eBillingHub and education on law firm ebilling, while continuing to provide useful free resources such as the LEDES Toolkit, used by hundreds of firms and law firm service providers worldwide.
- The first release of the eBillingHub Lite, a flat fee, single web screen ebilling tool that allows law firms to prepare, track and manage eBills.

eBillingHub's flagship product, the eBillingHub, helps your law firm reduce the complexity of ebill submissions, eliminate billing backlogs and common submission errors, speed up the collection process, and minimize or eliminate the need for additional staff related to electronic billing. This all results in improved cash flow, increased partner distributions, and enhanced client service.

### **About eBillingHub**

eBillingHub is the leading provider of Software as a Service (SaaS) for law firms that makes it possible for them to simplify the electronic billing process. The company's patent-pending technology provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic billing process. Unlike LEDES creation tools, the eBillingHub optimizes the ebilling process by integrating a law firm's time & billing software with the firm's clients and their e-billing vendors through a single web portal. The eBillingHub is headquartered in Pittsburgh. For more information, visit <http://www.ebillinghub.com>
