### **eBillingHub First Law Firm eBilling Service to Support ADERANT**

*eBillingHub Only Tool to Support Major Law Firm Practice Management Systems to Simplify the Complexity of Legal eBilling; Also Increases Client Format Library by 33%*

**PITTSBURGH, Pennsylvania, September 4, 2007** — The eBillingHub, ([www.eBillingHub.com](http://www.eBillingHub.com)) the creator of the first simplified service that addresses the complexities of legal electronic billing, today announced that it has extended its solution to the ADERANT CMS.Net and Expert practice management software. eBillingHub simplifies the eBilling process for ADERANT customers. Customers can use eBillingHub in place of upgrading to ADERANT's recently released Expert 7.5 with enhanced ebilling functionality. Or, if they are already using Expert 7.5, they can use eBillingHub to extend these capabilities with a single web interface and automated submission for all of the leading eBilling vendors.

In addition to introducing support for ADERANT, the eBillingHub has also increased its 'out of the box' support for client formats from almost 300 to over 400. eBillingHub's client formats eliminate the burden and expense of a law firm having to create, support, and maintain these formats.

"Law firms have patiently waited for a true ebilling solution, while dealing with the onslaught of process complexity due to growing eBilling volume - all imposed upon them, all just to get paid for the services they have provided. Law firms are frustrated with the inadequate returns they have achieved with traditional, enterprise software technology, especially for eBilling," said Greg Coticchia, CEO of the eBillingHub. "eBillingHub provides the only technology that manages the process of legal eBilling from 'end-to-end', combined only delivery architecture suited for solving the legal ebilling challenge, and that is through software as a service (SaaS). Without this delivery style, other solutions will continue to burden law firms with increased complexity and escalating costs - both in software and manpower."

The eBillingHub offers Thomson Elite, Thomson ProLaw and now ADERANT CMS.Net and Expert customers a path to simplify the complexity and expense associated with electronic billing. Unlike LEDES ([www.ledes.org](http://www.ledes.org)) formatting tools for invoicing, eBillingHub delivers 'end-to-end' capabilities that firms require that address the entire electronic billing process, not just aspects of the issue. As the only Software as a Service (SaaS) offering available to law firms for eBilling, the eBillingHub offers 'out-of-the-box' integration with the leading practice management systems and eBilling vendors, dramatically reducing the costs that law firms experience today with electronic billing.

"We have been supporting and delivering on the ADERANT platform since the first of this year, and now, with many customers on board, we wanted to make sure as many ADERANT customers were aware of the eBillingHub's availability," continued Coticchia.

ADERANT customer Kutak Rock, Omaha, Nebraska, and ranked as number 155 in the 2006 AmLaw 200 rankings is also a customer of the eBillingHub. Eric Tuomikoski, Sr. Accounting/Financial Systems Analyst of Kutak Rock, stated, "I was impressed. I was amazed at how intuitive and simple the eBillingHub software was designed. It was really refreshing to have an application be so powerful and user friendly. A load was lifted from my shoulders here."

Along with this new platform support, eBillingHub announced the increased availability of over 100 new client formats in less than six months. ([www.eBillingHub.com/ver2/Solutions\\_eBillingHub\\_SupportedFormats.aspx](http://www.eBillingHub.com/ver2/Solutions_eBillingHub_SupportedFormats.aspx)) These formats are a shared resource, and available immediately to eBillingHub law firm customers, allowing them to remove the burden of individually creating and maintaining common client formats. These formats are also updated and maintained, free of charge.

eBillingHub's flagship product, the eBillingHub, allows law firms reduce the complexity of ebill submissions, eliminate billing backlogs and common submission errors, speed up the collection process, and minimize or eliminate the need for additional staff related to electronic billing. This all results in improved cash flow, increased partner distributions, and enhanced client service.

### **About eBillingHub**

eBillingHub is the leading provider of Software as a Service (SaaS) for law firms that makes it possible for them to simplify the electronic billing process. The company's patent-pending technology provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic bills. Unlike LEDES creation tools, the eBillingHub simplifies the ebilling process by integrating a law firm's time & billing software with the firm's clients and their e-billing vendors through a single web portal. The eBillingHub is headquartered in Pittsburgh. For more information, visit <http://www.eBillingHub.com>
