NEWS FOR IMMEDIATE RELEASE

eBillingHub® Announces Reseller Partnership with Thomson Elite

Market-leading electronic billing service for law firms now available through Thomson Elite for Elite and ProLaw customers

PITTSBURGH – December 3, 2007 – eBillingHub®, the market leader in simplifying electronic billing for law firms, today announced it has entered into a reseller agreement with the company’s long-time partner Thomson Elite, the global provider of world-class financial and practice management systems to the legal industry and other professional services markets. With this agreement, customers of the Thomson Elite and ProLaw systems will be able to purchase the eBillingHub directly from Thomson Elite. Additionally, beyond Thomson Elite offering the eBillingHub directly to its customers, this agreement also allows for further integration of the two companies’ respective product offerings.

“Advancing our partnership with Thomson Elite by having them distribute our automated electronic billing delivery and management system acknowledges our market leadership,” said Greg Coticchia, chief executive officer of eBillingHub. “This agreement legitimizes our Software as a Service (SaaS) approach and enables us to expand our market faster than our current pace. More importantly, it provides Thomson Elite and ProLaw customers with a much-needed solution to the growing requirements and complexities of electronic billing.”

“This initiative brings a complete electronic billing solution to the legal market quickly and efficiently,” said Dan Tacone, senior vice president, Thomson Elite. “Both Thomson Elite and eBillingHub are committed to delivering innovative solutions that address the largest problems law firm financial operations face today.”

The eBillingHub helps law firms speed up the collections process, reduce the complexity of electronic invoice submissions, eliminate billing backlogs and common submission errors, and minimize or eliminate the need for additional staff to administer electronic billing. For law firms, using the eBillingHub results in improved cash flow, increased partner distributions, and enhanced client service.

“With this relationship now in place, we can continue to expand the eBillingHub in three areas: complementary new functionality, geographic expansion, and other practice management systems,” according to Gabriela Istruiz, chief strategy officer of eBillingHub. “This year alone we have expanded to over 400 client formats, added dashboards for on-demand electronic billing status, broadened our customer base beyond the United States, and added ADERANT to the time and billing systems eBillingHub now supports. We will continue to pursue initiatives like these, and we’re confident the agreement with Thomson Elite will allow us to do so at a faster pace.”

Initially released in 2004, eBillingHub uses a service-oriented architecture (SOA) and Web services standards for its integration with practice management systems such as Thomson Elite and ProLaw, ADERANT, and others. With hundreds of customers and service providers using eBillingHub and its LEDES Toolkit™, the eBillingHub is often considered a de facto standard for electronic billing for law firms of all sizes.

About eBillingHub®

eBillingHub is the leading provider of Software as a Service (SaaS) solutions for law firms, making it possible for firms to simplify the electronic billing process. The company’s patent-pending technology provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic billing process.

Unlike tools used by law firms to create LEDES invoice files, the eBillingHub simplifies the electronic billing process by integrating a law firm’s time and billing software with multiple electronic billing vendors which are often specified by a firm’s clients.
