NEWS FOR IMMEDIATE RELEASE

eBillingHub® Announces Reseller Partnership with RainMaker Software

Market-leading electronic billing service for law firms will be available through RainMaker Software for Platinum and Visual Pyramid customers.

PITTSBURGH – January 8, 2008 – eBillingHub®, the market leader in simplifying electronic billing for law firms, today announced it has entered into a reseller agreement with RainMaker Software, Inc., a full-service provider of financial and practice management systems and business intelligence software. RainMaker Software is one of the leading time and billing software providers within the mid-to-large sized law firm market.

With this agreement, RainMaker will provide seamless integration so that its Platinum and Visual Pyramid clients can utilize the eBillingHub service directly from a RainMaker branded website. Additionally – beyond offering the eBillingHub directly to its customers – the agreement allows for further integration of the two companies' respective product offerings.

“This partnership furthers eBillingHub’s reach in servicing law firms, partnering with the clear leader in the market space,” said Greg Coticchia, chief executive officer of eBillingHub. “This reseller agreement – our second in one month with a major provider of law firm time and billing systems – solidifies our position as the defacto industry standard for law firm electronic billing.”

“RainMaker’s number one goal is to provide top quality products and services that facilitate significant financial growth within mid-to-large sized firms, while streamlining processes,” said Jim Hammond, president of RainMaker Software. “Partnering with eBillingHub, the leading provider of electronic billing software services in the legal market, is a logical business step. Through innovative and seamless technology, RainMaker clients will be able to more efficiently bill their clients electronically and improve cash flow.”

The eBillingHub helps law firms speed up the collections process, reduce the complexity of electronic invoice submissions, eliminate billing backlogs and common submission errors, and minimize or eliminate the need for additional staff to administer electronic billing. For law firms, using the eBillingHub results in improved cash flow, increased partner distributions, and enhanced client service.

“We have experienced tremendous market acceptance in the last 12 to 18 months, growing our customer base 244% this year alone, and we see that law firms of every size have a requirement for simplifying eBilling,” according to Gabriela Isturiz, chief strategy officer of eBillingHub. “With RainMaker as a partner, we will be able to meet the needs of their large customer base and expedite our ability to serve these customers.”

Initially released in 2004, eBillingHub delivers its law firm eBilling solution as Software as a Service (SaaS) built on a service-oriented architecture (SOA), providing Web services standards for its integration with practice management systems such as Thomson Elite and ProLaw, ADERANT, RainMaker and others. With hundreds of customers and service providers using eBillingHub and its LEDES Toolkit™, the eBillingHub has established itself as the industry standard for electronic billing for law firms of all sizes.

About eBillingHub®

eBillingHub delivers simplified electronic billing for law firms worldwide, making it possible for firms to eliminate costs and improve cash flow as they grow their electronic billing volume. The company’s patent-pending technology, delivered as Software as a Service (SaaS), provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic billing process. Unlike tools used by law firms to create LEDES invoice files, the eBillingHub simplifies the electronic billing process by integrating a law firm’s time and billing software with multiple electronic billing vendors, which are often specified by a firm’s clients.
