NEWS FOR IMMEDIATE RELEASE

**eBillingHub[®] Strengthens its Automated Electronic Bill
Submission Integration with DataCert**

PITTSBURGH, PA. March 5, 2008 – The eBillingHub, the market leader in simplifying electronic billing for law firms, today announced a strengthening of its relationship with DataCert to enhance the connectivity between their respective electronic billing products.

The automated bill submission capabilities of the eBillingHub, with seamless connectivity capabilities to DataCert's ShareDoc[®] service for law firms, increases both companies' commitment in delivering streamlined connectivity for aggregated and automated bill submission.

"The eBillingHub's connectivity with DataCert underscores our 'best of breed' service as the leader in simplifying eBilling for law firms. We were the first vendor to give this functionality to law firms, and continue to be the only one delivering it in production to customers today," said Greg Coticchia, CEO of the eBillingHub. "Law firms deserve a better way to accomplish eBilling than traditional enterprise software that produces LEDES formats. The eBillingHub, based on Software as a Service (SaaS), has demonstrated itself as the next generation of service."

"We are delighted to continue, as well as improve, our work with the eBillingHub. We remain committed to reducing the administrative cost and

complexity of electronic billing for our law firm clients, and our work with the eBillingHub is an important strategy in achieving that goal,” stated Don Schad, DataCert's general manager for corporate legal solutions.

Together, DataCert and the eBillingHub help law firms speed up the collections process, reduce the complexity of electronic invoice submissions, eliminate billing backlogs and submission errors, and minimize or eliminate the need for additional staff to administer electronic billing. Using the eBillingHub also results in improved cash flow, increased profit per partner and enhanced client service.

The eBillingHub is available for customers of Thomson Elite and ProLaw as Elite eBillingHub directly from Thomson Elite, a result of a reseller agreement between the two organizations. Similarly, the service is exclusively available to customers of RainMaker Platinum and Visual Pyramid directly from RainMaker Legal.

Initially released in 2004, the eBillingHub delivers its law firm eBilling solution as Software as a Service (SaaS). It is built on a service-oriented architecture (SOA) and provides Web services standards for its integration with practice management systems such as Thomson Elite and ProLaw, ADERANT, RainMaker and others. With hundreds of customers and service providers using eBillingHub and its LEDES Toolkit™, the eBillingHub has established itself as the industry standard for electronic billing for law firms of all sizes.

eBillingHub®

eBillingHub delivers simplified electronic billing for law firms worldwide, making it possible for firms to eliminate costs and improve cash flow as they grow their electronic billing volume. The company's patent-pending technology, delivered as Software as a Service (SaaS), provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic billing process. Unlike tools used by law firms to create LEDES invoice files, the eBillingHub simplifies the electronic billing process by integrating a law firm's time and billing software with multiple

electronic billing vendors, which are often specified by a firm's clients. For more information, please visit www.ebillinghub.com
