eBillingHub® Selects Rackspace Hosting For High Availability and Performance

Market Leader for Law Firm Electronic Billing Relies on Web Hosting and Cloud Expertise to Support Growth of SaaS-based eBilling

SAN ANTONIO, April 14, 2010 – eBillingHub®, the leader in simplified electronic billing for law firms worldwide, today announced that it has selected Rackspace® Hosting (NYSE:RAX), a world’s leader in the hosting and cloud computing industry, as its hosting provider. eBilling Hub will use the Rackspace’s Managed Private Cloud offering to service their customer’s e-billing needs. Their decision to select Rackspace as a hosting provider was driven by eBillingHub’s rapid growth and the increasing global needs of its worldwide customer base for scalable and continuous electronic billing operations. Rackspace’s Managed Private Cloud provides the scalability, flexibility and resource optimization that make shared cloud offerings so compelling but allows eBilling Hub to maintain the optimal performance and security of a dedicated solution.

“We are focused on delivering simplified and automated eBilling for our multinational customers,” said Ryan Ladisic, VP of Sales and Marketing, eBillingHub. “Worrying about our IT infrastructure and cloud deployment takes time and energy away from our core mission of automating the process, and reducing the related costs of law firm electronic billing. With Rackspace we found a trusted and proven partner who has the expertise and worldwide skills to support our Software as a Service (SaaS) application needs on a 24/7 basis.”

eBillingHub’s SaaS implementation enables law firms to go live on the system in as little as 10 hours, eliminating the hardware purchase requirements of traditionally delivered software or budgeting for any professional services. eBillingHub simplifies the electronic billing process by integrating a law firm’s time and billing software with multiple electronic billing vendors, reducing overall complexity and resulting in a predictable, dependable, and efficient process.

“As eBilling Hub’s hosting provider, we play an important role in helping them to achieve their business goals,” said Jim Lewandowski senior vice president of worldwide sales, Rackspace Hosting. “The Rackspace Managed Private Cloud offers them additional flexibility and security features to make available to their customers and our service is backed by our world-class Fanatical Support®.”

About eBillingHub®

eBillingHub delivers simplified electronic billing for law firms worldwide, making it possible for firms to eliminate costs and improve cash flow as they grow their electronic billing volume. The company’s patent-pending technology, delivered as Software as a Service (SaaS), provides a comprehensive and collaborative approach for preparing, tracking, submitting and managing the electronic billing process. Unlike tools used by law firms to create LEDES invoice files, the eBillingHub simplifies the electronic billing process by integrating a law firm’s time and billing software with multiple electronic billing vendors, which are often specified by a firm’s clients.
